DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejection under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 6-11, 13, and 15-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Ratzel (5,571,067).

Ratzel discloses a method of determining a total amount of stock material passing through a cushioning conversion machine comprising providing sheet material S, converting material S into cushioning product P, and monitoring passage of stock material through conversion machine 10. Information of the amount of stock material is stored, retrieved, and exchanged with conversion machine 10 by process controller/computer 11.

Ratzel discloses automatically downloading stored information to a remote processor through the use of a bar code system; see column 6, lines 53-58.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 12 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ratzel (5,571,067).

Ratzel does not directly disclose transmitting information to a personal computer or using a visual display, however the examiner takes OFFICIAL NOTICE that doing so would have been obvious to one of ordinary skill in the art at the time of the invention was made.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
